

Jannatul Bakia

Full-Stack Developer | MERN Stack

jannatulbakia026@gmail.com | Phone: +8801643056022 | GitHub: Jannatul Bakia | LinkedIn: Jannatul Bakia

Professional Summary

Full-stack developer with production experience across the MERN stack (React.js, Next.js, Node.js, Express.js, MongoDB) and TypeScript, who builds AI-assisted workflows into daily development using GitHub Copilot, Cursor, and Windsurf to accelerate delivery without sacrificing code quality. Comfortable integrating third-party AI APIs (GPT) into real production features, working daily from the terminal and Git, and taking full ownership of tasks end-to-end from schema design through deployment. Fast self-learner who adapts quickly to new AI-powered developer tools and remote, fast-moving team environments.

Technical Skills

AI-Assisted Development: GitHub Copilot, Cursor, Windsurf, GPT API integration, prompt-driven debugging & code review

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5/CSS3

Backend & APIs: Node.js, Express.js, REST API Design, JWT Authentication, Firebase

Databases: MongoDB, SQL

Tools & Workflow: Git & GitHub, Docker, Terminal / CLI, VS Code, Python (basics)

Security: JWT-based auth, role-based access control, input validation

Soft Skills: Ownership mindset, Self-Learning, Problem Solving, Teamwork, Adaptability, Communication

Experience

Full-Stack Developer Intern

2026

SRIYOG Consulting

- Built full-stack web applications from scratch using Node.js/Express.js and MongoDB, using AI coding assistants daily to speed up implementation while working from the terminal and VS Code in a professional consulting team.
- Designed and integrated RESTful APIs connecting frontend and backend services, taking ownership of the integration layer end-to-end.
- Built responsive React.js frontends, collaborating on product development from Figma design through production deployment.
- Used Git/GitHub for version control and code review, and quickly picked up new AI-assisted tools and workflows as project needs changed.

Projects

DonateBlood – Blood Donation Platform

Solo Developer

Node.js, Express.js, MongoDB, JWT, REST APIs, React.js

- Independently designed and built a complete backend with Node.js/Express.js and a RESTful API layer serving a React.js frontend for a nationwide platform in Bangladesh, using AI coding assistants (Copilot/Cursor) to accelerate development.
- Implemented JWT-based authentication and role-based dashboards for admin, donor, and volunteer roles, testing each workflow thoroughly before release to ensure security and output quality.
- Built real-time donor search with geolocation filtering and live donation tracking, iterating based on feedback to improve reliability.
- Owned the project fully – from database schema design to deployment – managing all code through Git version control.

Shasthobondhu – Healthcare Platform

Group Project

Node.js, React.js, Firebase, MongoDB, REST APIs, GPT API

- Integrated a GPT-powered chatbot API into a production feature, connecting Firebase real-time data and MongoDB persistence – hands-on experience prompting, testing, and refining AI-generated outputs.
- Developed an offline search system and anonymous messaging feature, carefully validating data and edge cases.
- Designed and built a responsive admin dashboard with REST API integrations for real-time monitoring.

Secure Exam – Online Examination Platform

Group Project

Next.js, Node.js, MongoDB, REST APIs

- Built a role-based backend for student and instructor roles on Next.js/Node.js, collaborating closely with teammates via Git and shared code review.
- Implemented timed workflows with automated submission triggers and real-time activity logging, testing thoroughly to meet quality standards under time pressure.
- Built instructor management tools and an exam notification system integrated via REST APIs, taking ownership of the feature from design through delivery.

Education

BAIUST (Bangladesh Army International University of Science and Technology)

2022 – 2026

B.Sc. in Computer Science & Engineering

CGPA: 3.83 / 4.00

Achievements & Activities

- **Champion** – BAIUST 2025 CSE Fall Fest Hackathon (as part of a team)
- **1st Runner-Up** – BAIUST 2025 CSE Fest Hackathon (as part of a team)
- Participated in Google DevFest, building real-world problem-solving projects with modern web technologies.
- Participated in Intra-department Programming Contest.
